

Net-C voice panels are a cost effective method for terminating multi-pair telephone cables. All the panels we offer are 19" for rack mounting and 1U high. The panels are available as a 25 port with all the RJ45 presentations in one line and a high density 50 port with the RJ45 presentations in two rows of 25.

- » High density option
- » Available in 4 wire or 6 wire
- » Built-in rear cable management
- » Numbered for ease of identification

Part codes	Descriptions
NC-PAT-25-VP-4	25 port 4 wire voice patch panel with rear cable management
NC-PAT-25-VP-6	25 port 6 wire voice patch panel with rear cable management
NC-PAT-50-VP-4	50 port 4 wire voice patch panelwith rear cable management
NC-PAT-50-VP-6	50 port 6 wire voice patch panelwith rear cable management

## Features & Benefits:

The panels have built in rear cable management as standard and each port is individually numbered for identification. Net-C voice panels are supplied as either 4 wire (3/6, 4/5) or 6 wire (1/2, 3/6, 4/5) with LSA Krone style IDC blocks.
